“For many years now, we are using the JetPeel delivery system by TavTech to apply Minoxidil into the scalp of women suffering from androgenetic alopecia hair-loss. I find the results significantly better than topical application. Combined with the ease of use and the painless patient experience, it has become our preferred method of use. Results are spectacular and life altering for many patients”.

Dr. Alex Ginzburg is a renowned Dermatologist with a world class reputation in the field of Hair-transplantation.
