Following the upgrade of the JetPeel device to JetPro, there was an important need to use the latest biochemical and dermatological research and the latest developments in active cosmetic ingredients in order to upgrade JetPeel's line of cosmetics

Formulation guidelines included:

- Optimization of trans-epidermal transport by adjusting concentrations and viscosity to the treatment goal: which skin layer should be reached and where should the active ingredients achieve a sustained effect
- Optimization and reformulation of the active ingredients based on the latest research and the most advanced supply sources
- Reduction of frictional resistance in the handpieces resulting in a constant flow and an increase in the efficacy of the handpiece

- A solid R&D platform for on-going JetCare innovation
 - continually to be upgraded
 - always based on new research
- The premium range of JetCare solutions guarantee treatment success and customer satisfaction due to the calibration, coherence and correlation between the device, handpieces and reagents

A new world of
JetCare awaits...

JetPeel by TavTech – the perfect trio combining:

- the enduring JetPro device,
- the original patented JetPeel handpieces, and
- premium JetCare solutions

designed exclusively for use together to deliver outstanding results

THANK YOU!
