## JetPeel Handpieces Reach Out for Beautiful Results

JetPeel by TavTech is the ultimate jet pressure energy skin treatment technology for a wide range of skin concerns, for all skin types, all year round, and always with the same comfort: non-invasive, needle free, pain free and no downtime

The JetPeel system, used worldwide by cosmeticians and dermatologists, consists of the famous trio of components, designed exclusively for use together to deliver outstanding results:

The enduring  
JetPro device

The original patented  
JetPeel handpieces

The premium  
JetCare solutions

The JetPeel Handpieces are proudly developed and patented by TavTech, supporting the powerful proven results of JetPeel treatments for beautifully smooth and rejuvenated skin, scalp, and hair.

**JetPeel Handpieces: Researched, perfected, patented**

The JetPeel Handpieces are the result of decades of research and development, updated and perfected over many years and patented for exclusive use with JetPeel devices and JetCare solutions.

JetPeel Handpieces are designed for non-invasive, non-contact, trans-epidermal delivery. The jet pressure causes a cavitation effect, stretching the skin to open micro-channels, allowing the nourishing solutions to penetrate the skin with complete efficacy and safety.

The unique nozzle design is the key to JetPeel treatment success, enabling the ideal pressure, flow rate, droplet size and speed, spray pattern and reach of the jetstream into the skin.

**The JetPeel Handpiece Series: Even Better**

Now, the DoubleJet and TripleJet include a “sleeve” that protects needles from damage and delivers higher quality jets for even better exfoliation and infusion. All handpieces are supplied with one smaller spike size to protect the rubber top of the solution bottles,

**Unique handpieces for unique epidermal effects**

SingleJet Narrow (Magic)

DoubleJet

TripleJet

# JetPeel Sterile Handpiece range

## TripleJet

For most JetPeel procedures, including lymphatic massage, exfoliation and infusion for face and body

## SingleJet Narrow (Magic)
