

## The Skin Rejuvenation Revolution

Welcome to the world of JetPeel by TavTech: patented jet pressure technology that delivers beautiful, healthy, and rejuvenated results.

Based on over 20 years of research & development and clinical experience, TavTech's unique Jet technology is available in over 50 countries worldwide under three sought-after brands: **JetPeel** aesthetic skin rejuvenation, **JetCare** prestige cosmetic liquid solutions & **JetOx** medical wound care.

## JetPeel Trio – Amplify the results

The **JetPeel** jet pressure energy system delivers trans-epidermal infusion of a rich variety of nutrients and solutions for the treatment of an array of skincare and aesthetic conditions. The treatment includes Lymphatic Massage, Exfoliation, and trans-epidermal Infusion.

The JetPeel system is made up of three powerful elements:

**JetPro Devices:** JetPro uses advanced jet propulsion technology harnessed to provide trans-epidermal treatment in a compact, easy-to-use device. The JetPro devices create high-pressure, high-velocity fine liquid jet streams applied to the skin with the patented JetPeel handpiece. The JetPro Duo and Pro ToGo models include blue and red LED add-ons for simultaneous Jet-LED treatment.

**JetPeel Handpieces:** The unique patent protected handpieces feature various nozzle varieties to deliver the right JetPeel effect for the skin's needs. The pressurized jet streams gently stretch the skin into concave regions, opening trans-epidermal microchannels allowing nourishing JetCare solutions to penetrate deeper, amplifying their beneficial effects.

**JetCare Solutions:** The line of unique nutrient-rich cosmetic solutions developed to treat a wide variety of skin concerns.
