 JETPROTOGO
by TavTech

JetPeel by TavTech is the world's leading jet pressure-energy technology for non-invasive, pain-free aesthetic skin treatments that deliver visible, beautiful results.

Aestheticians worldwide harness the clinically proven benefits of JetPeel every day in their clinics, treating a wide range of skin concerns – from acne and anti-aging to redness and rejuvenation. Suitable for all skin types and all year round, customers enjoy the relaxing, effective experience of JetPro for jet treatments and JetPro Duo, which integrates red & blue LED technology for simultaneous combined Jet-LED treatments and enhanced results.

The JetPeel System: Trio of Excellence

Three powerful components comprise the JetPeel system:

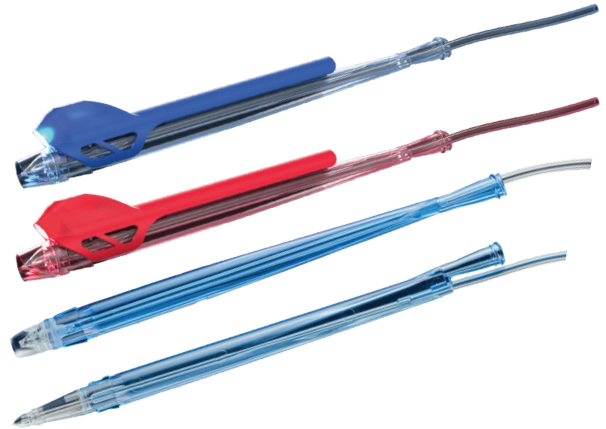

JetPro Devices

Use advanced jet pressure-energy technology to create high-pressure, high-velocity fine liquid jet streams for effective exfoliation and trans-epidermal treatment. The exclusive JetPro Duo combines LED light-therapy with Jet technology to deliver amplified results.

JetPeel Handpieces

Unique patent protected handpieces create pressurized jet streams that gently stretch the skin into concave regions, opening trans-epidermal microchannels for the delivery of nourishing JetCare solutions.

JetCare Liquid Solutions

JetPeel's line of exclusive nutrient-rich cosmetic solutions developed to treat a wide variety of skin concerns.

With the right combination of JetPro device, JetPeel handpiece and JetCare solution, aesthetic professionals can provide the ideal treatment for individual customers, to bring out the very best in their skin.

Same treatment, superb results, on the go

When customers come to the clinic for JetPeel, they enjoy a pleasant, comfortable treatment and outstanding results. Non-invasive and needle-free, JetPeel needs no downtime or recovery. After a session, the customer simply stands up and walks out with confidence, ready to face the world with visibly smoother, healthier and younger looking skin.

Now with JetPro ToGo, the clinic goes with you.

JetPro ToGo: Go with the benefits

- Compact device – fits in any car or trunk
- Simple setup
- Trolley wheels & handle for easy transport
- Protective cover and accessories bag included

Weight: 17 kg

Go beyond the clinic Offer a VIP JetPeel experience

JetPro ToGo is the compact version of the JetPro Duo, so you can pack your clinic and deliver the combined JetPeel and LED-light treatment in any setting. Meet the customers where they want and offer an exclusive VIP JetPeel experience at their location and convenience. With JetPro ToGo, expand your business and your success beyond the clinic.

Aestheticians can provide the same professional JetPro Duo results in customers' homes, offices, corporate events, bridal parties, birthday parties, spa days, or wherever the clientele requests it. Don't limit your practice to the clinic – take your JetPeel success anywhere.
