Expand Your Treatment Spectrum

Color Your
Clinic Results
with JetPeel
by TavTech

Boost your JetPeel power with JetPro Duo and JetPro ToGo treatment devices that combine LED therapy with TavTech's world-leading jet pressure energy to deliver enhanced aesthetic results.

With JetPeel's jet-LED treatment, clinicians deliver two aesthetic technologies simultaneously, for a dual-powered approach that effectively treats a wide variety of skin concerns and leaves customers glowing and satisfied.

Aesthetic success at different depths

LED light therapy is clinically proven to cause natural photo-biochemical reactions in the skin cells that can lead to rejuvenation and to beautifully smooth results.

Different wavelengths penetrate different levels of the skin, supporting various aesthetic benefits.

The JetPro Duo and JetPro ToGo devices are purpose-built with Red and Blue LED add-ons. Expand your treatment spectrum with an advanced LED Kit supplied separately that includes three additional LED colors: Green, Yellow-Green and Amber.

Blue LED (460-470nm)

Penetrates the uppermost epidermis to target bacteria that causes mild-moderate acne. Also ideal for couperose and sensitive skin, and to soothe and balance oily scalp.

Recommended for use with: JetCare Anti-Aging Care Peptide Complex, JetCare Anti-Aging Care Witch Hazel & Peptides, JetCare Selective Care Clear, JetCare Selective Care Soothing, JetCare Selective Care Lightening, JetCare Selective Care Growth Factor, JetCare Selective Care Scalp & Hair, and JetCare Ayurveda for Sensitive Skin.

Green LED (535-545nm)

Penetrates the upper skin levels, where it targets melanin producing cells, ideal for treating pigmentation issues such as age spots, sun spots, and uneven complexion.

Recommended for use with: JetCare Anti-Aging Care Peptide Complex, JetCare Anti-Aging Care Witch Hazel & Peptides, JetCare Selective Care Lightening and JetCare Selective Care Growth Factor.

Yellow-Green LED (565-575nm)

Penetrates to the intermediate skin layers, with soothing, anti-inflammatory properties to help treat skin redness and irritation, and sensitive, itchy scalp.

Recommended for use with: JetCare Ayurveda for Sensitive Skin, JetCare Selective Care Soothing and JetCare Selective Care Scalp & Hair.

Amber LED (585-595nm)

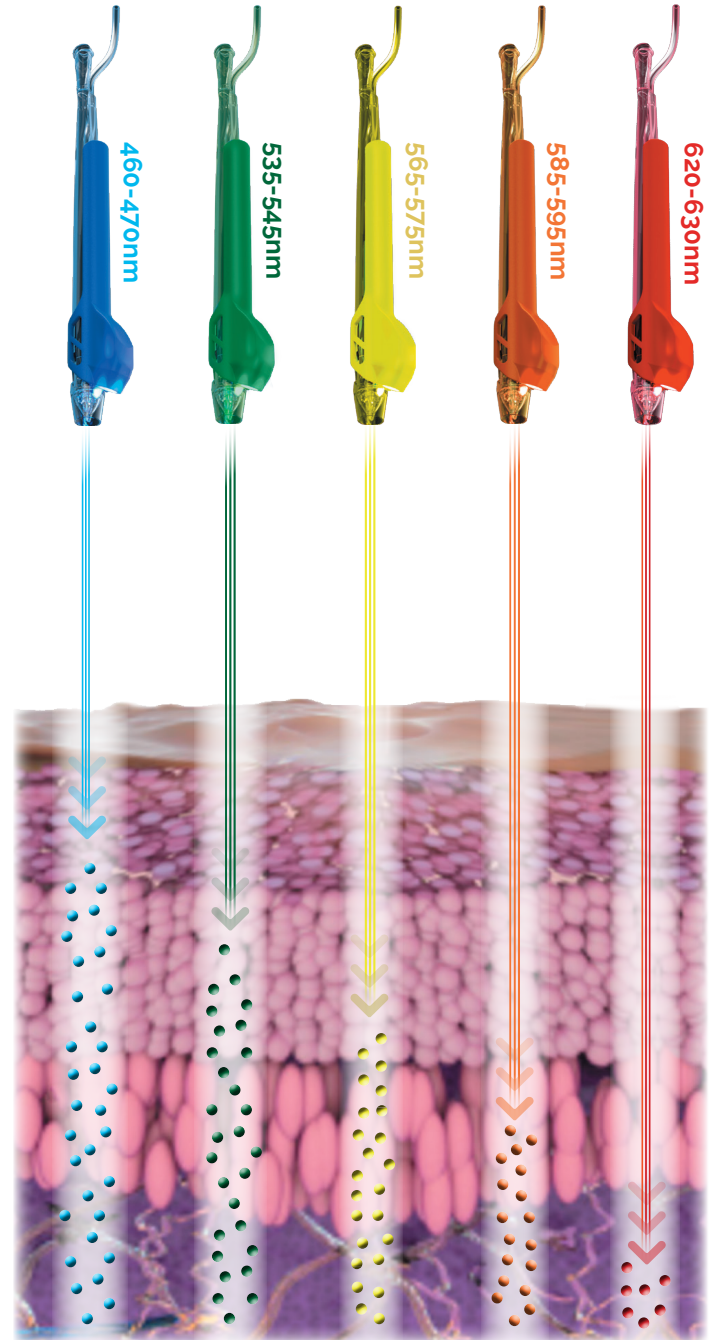

Offers deeper penetration with anti-inflammatory and anti-oxidative effects, helping to reduce redness from sunburn and rosacea, and soothe other causes of skin inflammation, and assists with protecting against skin damage.

Recommended for use with: JetCare Youth Dead Sea liquid solutions to maintain the appearance of healthy, young skin.

Red LED (620-630nm)

Achieves the deepest penetration to the lower dermis, suitable for anti-aging treatments that target loss of tone and wrinkles. Also treats pigmentation and post-acne skin for enhanced vitality and glow.

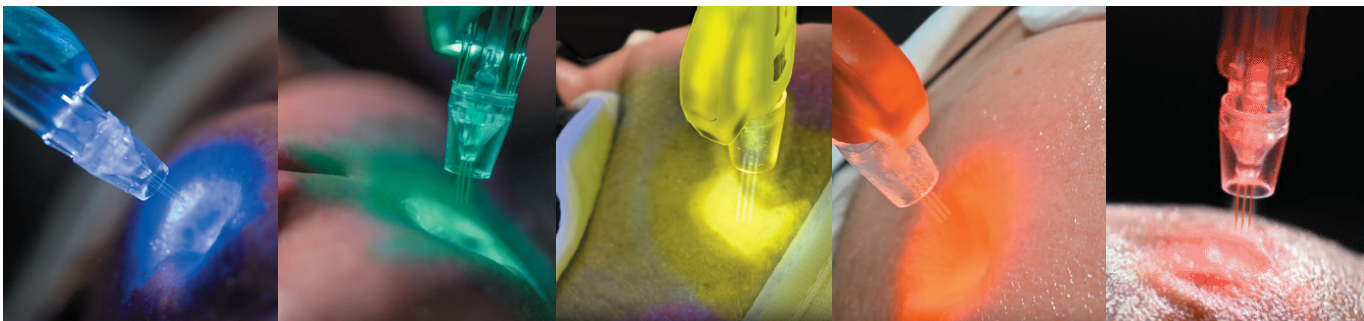

Recommended for use with: JetCare Anti-Aging Wide Range Hyaluronic Acid, JetCare Anti-Aging Care Peptide Complex, JetCare Anti-Aging Care Witch Hazel & Peptides, JetCare Selective Care Argireline® Complex, JetCare Selective Care Lightening, and JetCare Selective Care Growth Factor.

More colors, more vibrant results

With JetPeel's integrated LED technology and advanced LED Kit, you benefit from the combined power of two complementary aesthetic treatments in one clinic session:

- **Better results:** By using an LED add-on with JetPeel, you can achieve better treatment results in a single treatment session.
- **No added treatment time:** The jet-LED approach combines two simultaneous treatments, so you don't need to add any extra time to the session.
- **No extra consumables:** The LED handpiece components are all you need – use them just like any JetPeel handpiece and deliver the combined Jet-LED effect, without adding any additional consumables.

Light the way to success

Experience the LED difference with JetPro Duo and JetPro ToGo, featuring Red and Blue LED handpiece components for targeted aesthetic power.

Extend the possibilities with the advanced LED Kit, supplied separately, delivering additional skin-enhancing benefits of Green, Yellow-Green and Amber light waves for your clients.

The dual Jet-LED treatment is the ultimate win-win, for your clinic and your customers. Power your performance with color, take your clinic to the next level.
